PROJECTS

CrowdSound

[Live Site](#) | [Github](#)

A SoundCloud inspired site, using Ruby on Rails, React, and Redux

- Implemented a playback bar that continuously plays content while navigating throughout the site by designating a slice of state to update as the audio source changed
- Integrates Redux for unidirectional state management
- Combines Rails' Active Storage with AWS for media retrieval

Angry Nerds

[Live Site](#) | [Github](#)

An Angry Birds inspired multi-level game using JavaScript and Canvas

- Created artificial gravity and friction to simulate real-world physics
- Used collision detection for objects to determine redirection

Chess

[Github](#)

The timeless game of chess, in Ruby

- Implemented rich use of OOP and class inheritance for pieces, resulting in DRY code.
